

Coral Conference Bridge Manager

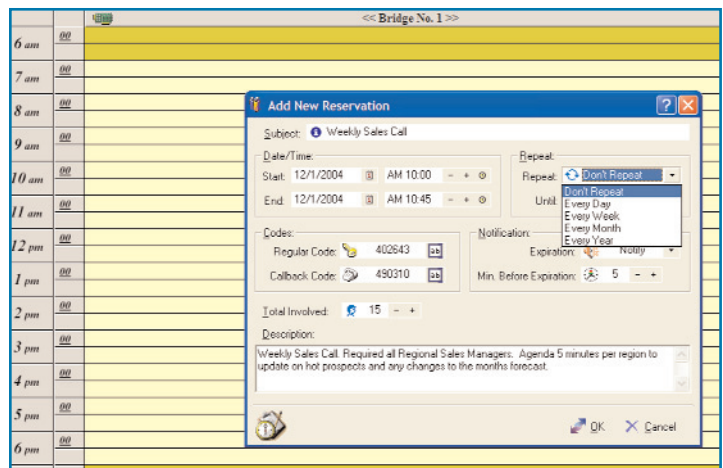

Connect your team anytime, anywhere.

You can equip your employees with laptops and mobile phones and expect to reach them whenever the customer demands. But organizations need to be able to effectively provide their teams with the opportunity to share knowledge real time. Whether it is regularly scheduled conferences or an impromptu meeting to capitalize on a sales opportunity, you need the tools to get everyone in tune, and on the same page.

Every Coral IPx system is a conference bridge. This eliminates the costs associated with external conference services which often require a set up fee as well as connect charges and per minute fees per participant.

The Coral IPx systems are designed to allow you to customize how your conferencing facilities are sized, and provide cost effective growth by adding additional conference resources. And with the Coral Conference Bridge Manager software, setting up a conference is simple. The notifications and calendar integrations with Microsoft

Outlook are automatic. It has never been easier to own your conferencing resources, and to use the as much as you like.

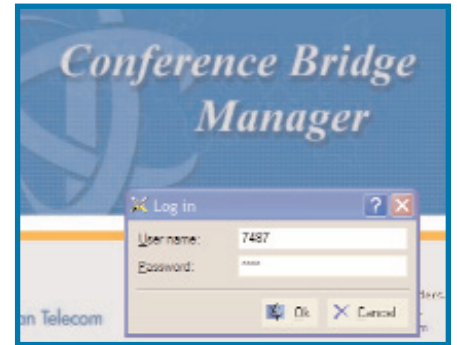

Coral Conference Bridge Manager

Save costs on conference calls by using the built-in conference bridge of the Coral IPx systems. Conferencing of 6 callers is standard without any signal loss on all of systems. Additional resources can be added when more conference capabilities are needed. Six conference bridges with 14 callers each are available on the IPx 500 system.

The Coral Conference Bridge Manager is an optional software application to provide both a graphical interface and voice resources to better manage conference facilities.

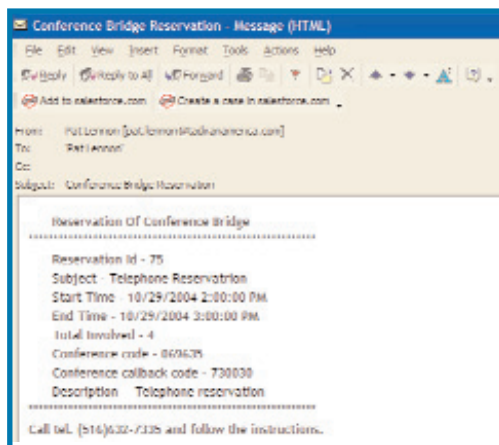

Business Benefits

- o Flexible - Allow multiple party conference service available from the smallest to largest companies.
- o Efficient - Setting up a conference by clicking on the calendar or by calling to receive step by step instructions over the phone.
- o Investment protection - Coral IPx system and any conference resources can be expanded and migrated.
- o Reliable - no signal loss on any internal station or external caller participating in a conference.
- o Cost effective - Eliminates the high cost of external third party conference services.
- o Scalable - Add additional conference ports as needed.
- o Security - Automatically assigns a six digit session ID that must be entered to join the conference.

System Highlights

- o Schedule conferences from your telephone following verbal step-by-step instructions. Or use the Coral Conference Bridge Manager (Microsoft Windows-based) software to set up or view scheduled events.
- o The Coral IPx has the ability to either license additional conference ports with the Coral IPx 500 or adding two 15 party conference bridges with all other Coral IPx systems.
- o The Conference Bridge Manager is a self contained processor that allows scheduling and security of conference circuits in the Coral.
- o Conference Bridge Manager Client is loaded onto a PC. The application allows the user to view (in calendar form) when the conference bridge is available.
- o After scheduling a date, time and number of members for a conference bridge, the user can add it to an Outlook calendar or email the conference to other invitees.
- o Conferencing facilities are dynamic to allow for several 3 or 4 party conference or one large
