

Coral FlexSets

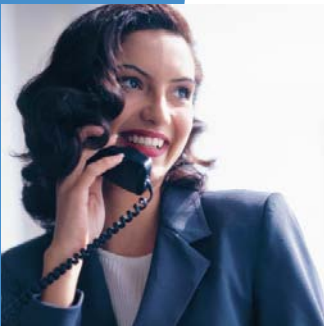

Coral FlexSets Communicate Your Way

If all businesses were the same, any communications system would do the job. In reality, your business has unique needs as it competes in today's marketplace. You need a communications platform that is flexible enough to conform to your business today – one that ensures you will be ready for the communications demands of tomorrow. Compatible with your Coral IP-enabled communications server, the Coral FlexSet™ series of advanced digital telephones ensures your business operations will never be restricted by the way your system operates. Coral FlexSets communicate your way.

A flexible communications platform that conforms to your business today

Flexibility Without Limits

Available in several models with a wide range of features and options, FlexSets are true information terminals offering versatility and flexibility. FlexSets' scalability is evident in the basic design. From six to as many as 148 user-defined buttons give users virtually unlimited power to define individual preferences.

The optional liquid crystal display presents caller and calling-party information, and when using a FlexSet with soft-keys, the display changes to show applicable feature options for one-touch activation. The hot-dial keypad and handsfree speaker permit fast on-hook dialing, and the highly visible message waiting indicator announces new messages.

Computer Telephony Integration

Install optional base-mounted modules to take advantage of Computer Telephony Integration (CTI) and other advanced applications that enable users to communicate and work more efficiently.

FlexSet 280S

- 26 buttons
- 3 x 40 LCD
- full speakerphone
- soft-key operation
- HDF support

The FlexSet 40B may be used as an add-on module with any 280 series terminal. Each 40B module has 40 user-defined buttons for line or feature use, and up to 3 modules may be installed for up to 148 buttons.

Flexibility with Distinction

Flexible Digital Telephone Choices

Available in your choice of pearl white or charcoal grey, all Coral FlexSets come with four buttons configured system-wide for consistent operation. A system administrator or individual users can define remaining buttons as needed.
