

17th & 18th May 2007

Olympia Exhibition Centre

## Tadiran and Fujitsu join forces at Olympia.

Fujitsu were invited by their Partner for Wireless Mesh, Firetide Networks, to share a stand at The Wireless Event in Olympia, London. They have strong reputation in their field, for example they were chosen for '2006 FIFA World Cup Germany', implementing a Wireless Mesh solution for all the stadiums for Voice, Data & Video (QoS). They all have recently new deployments for Singapore and Korea government.

Fujitsu's role was to be the system integrator's expertise for the sophisticated VoIP scenarios. Tadiran's Coral IPx Office was the Core of Fujitsu's live demo solution, which they integrated with Firetide WiFi Mesh and Tadiran phones on the LAN.
